PROFILE

My primary professional interest is the engineering aspect of delivering sophisticated yet robust and high-performance products. I fancy equally entire spectrum of technologies involved in it, including programming languages, teamwork techniques and thinking frameworks. My expertise lies mostly in web development, but I'm open to growing in other fields.

WORK EXPERIENCE

Atlassian
Sydney, Australia

2017–Present Senior Software Engineer, Atlassian

I lead frontend engineering of Advanced Roadmaps (former Portfolio for Jira) since its inception as Portfolio 3.0 through release for Jira Server and to Jira Cloud release. As a member of a fantastic team, I've got a chance to contribute to all stages of product development.

- Designed and documented app architecture.
- Organized regular knowledge sharing sessions.
- Facilitated cross-team collaboration and alignment.
- Led development of a few features.
- Implemented series of performance optimizations.
- Advised and aided process improvements.

Onsite & Remote

2006–2017 Various roles

Let me save you some time. I've been in the industry for a while and gained diverse experience working onsite and remotely in small and large teams. However, there is no point in listing companies and roles as my recent work experience summarises my profile the best. Just reach me out if you want to talk about my past in depth.

VOLUNTEER EXPERIENCE

CS Teacher

2016–2017 IT2School, Odessa

Run two Computer Sciences & Python courses for children of age 9-18.
